Create a new React Application with the name “myfirstreact”, Run the application to print “welcome to the first session of React” as heading of that page.

1) Install Node.js and npm

```
C:\Users\DELL>node --version
v22.14.0
C:\Users\DELL>_
```

2) Install create-react-app globally

```
C:\Users\DELL>npm install -g create-react-app
npm warn deprecated inflight@1.0.6: This module is not supported, and leaks memory. Do not use it. Check out lru-cache if you want a good
requests by a key value, which is much more comprehensive and powerful.
npm warn deprecated fstream-ignore@1.0.5: This package is no longer supported.
npm warn deprecated uid-number@0.0.6: This package is no longer supported.
npm warn deprecated rimraf@2.7.1: Rimraf versions prior to v4 are no longer supported
npm warn deprecated glob@7.2.3: Glob versions prior to v9 are no longer supported
npm warn deprecated fstream@1.0.12: This package is no longer supported.
npm warn deprecated tar@2.2.2: This version of tar is no longer supported, and will not receive security updates. Please upgrade asap.

added 64 packages in 9s

4 packages are looking for funding
  run `npm fund` for details
```

3) Create a new React application

```
C:\Users\DELL>npx create-react-app myfirstreact
create-react-app is deprecated.

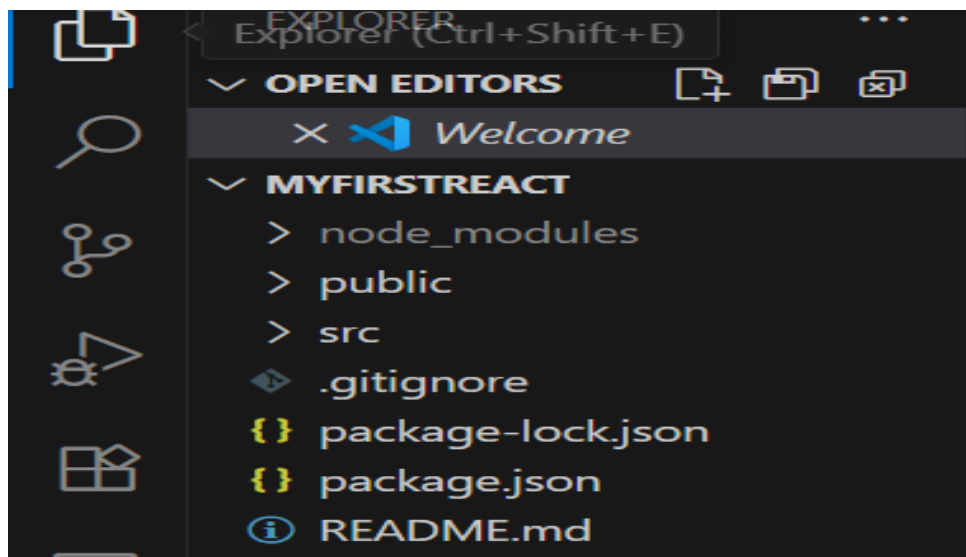

You can find a list of up-to-date React frameworks on react.dev
For more info see: https://react.dev/link/cra

This error message will only be shown once per install.

Creating a new React app in C:\Users\DELL\myfirstreact.

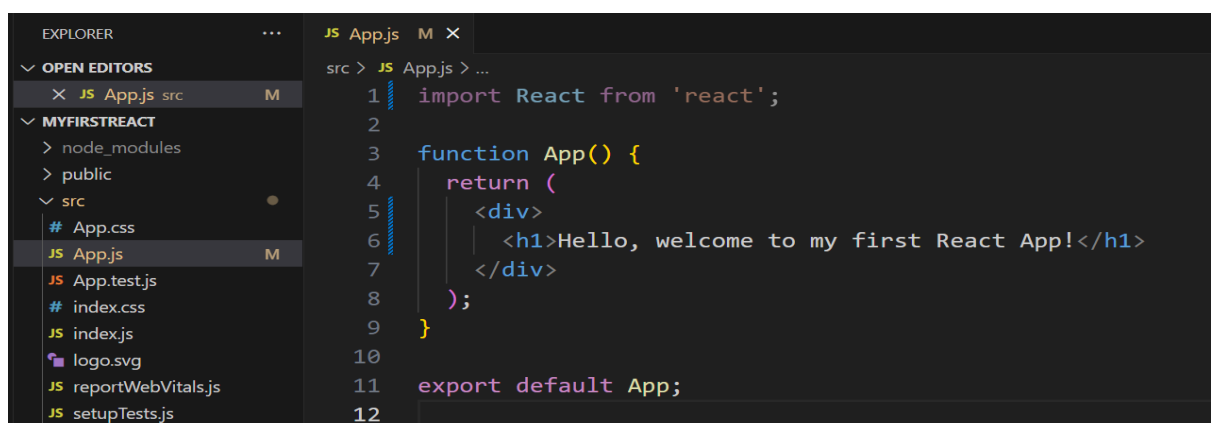

Installing packages. This might take a couple of minutes.
Installing react, react-dom, and react-scripts with cra-template...
```

4) Open the project in Visual Studio Code

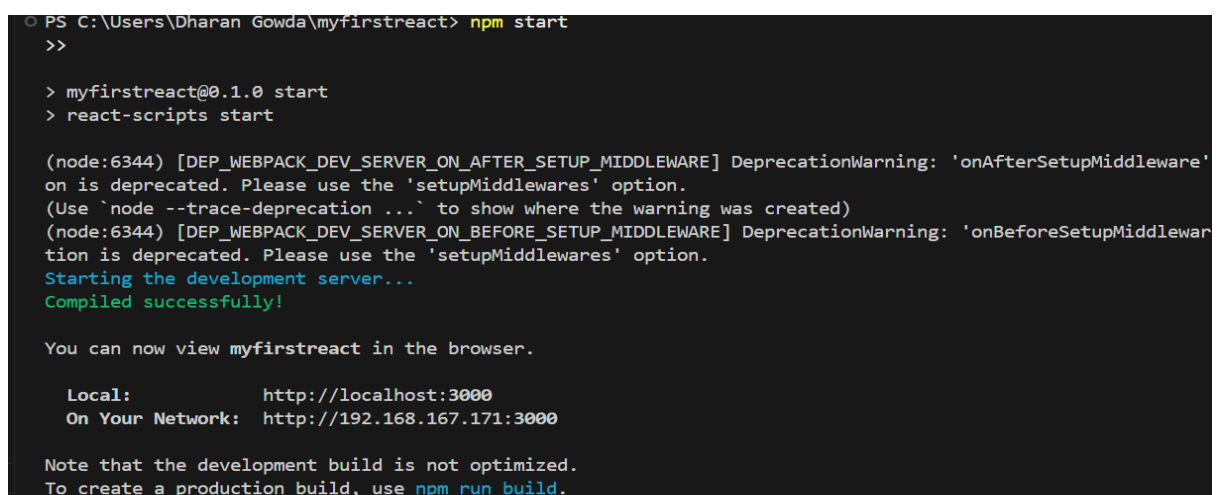

5) Remove all existing code in App.js

*) Replace with the following content

6) Start the React application

7) View in browser

Hello, welcome to my first React App!
